# **PART G: EMERGENCY CORPORATE RADIO SYSTEM (CRS) AND TELECOMMUNICATONS PLAN**

## **1.0 INTRODUCTION**

Upon implementation of the Emergency Response Plan, it will be important to ensure that communications are established between the emergency site(s) and the EOC. Also, communications may be required at various locations including evacuation centres, hospitals, and other key responding agencies.

Past disasters in Canada and the US have demonstrated that cellular networks and other public systems and even the normal fixed telephone system, become rapidly overloaded and cannot be relied upon for critical communications between emergency management personnel. In addition, the public telephone network can be disrupted by the emergency itself.

In any major emergency the ability to effectively communicate between various emergency services and their Command Centers, relief organizations and evacuation facilities and with the Emergency Operations Center (EOC) becomes crucial. The most disaster resistant communications tool available to the Town is a Radio System which is designed to Public Safety standards.

In a major emergency, in addition to the normal users of the Corporate Radio System, a number of other entities will be using the radio system, either as a prime communications tool or as a backup in the event of a failure of the public telephone system or of email. In addition, it can be expected that the traffic of the Radio system from its normal users (such as, but not limited to, Police, Fire and ambulance) will increase significantly, as will the use of 9-1-1 and 211.

## **2.0 AIM**

The aim of this *Radio and Telecommunications Emergency Response Plan* is to provide both operational staff and administrative staff with a tool to help maximize the efficiency of communications in a major emergency.

### **3.1 EMERGENCY RADIO AND TELECOMMUNICATIONS MEASURES TO BE IN PLACE AT ALL TIMES**

In order to be able to meet the communications needs of a major emergency the following equipment in the quantities stated should be set aside by the Emergency Telecommunications Coordinator and the Town Service Provider (Kelcom) and dedicated solely to major emergency use:

- Additional Fire mission critical radios 10
- Additional non mission critical radios for other Corporation of Amherstburg departments 10

- Headsets 10
- Additional radio batteries 30
- Additional radio battery chargers 20

All of the above Corporate radio system equipment shall be checked for full Serviceability by the Emergency Telecommunications Coordinator and The service provider on at least a monthly basis, including checking that the appropriate current channels and talk groups are programmed. The amateur emergency radio station should be similarly checked by the Amateur Radio Emergency Radio (ARES) Telecommunications Coordinator.

Plans are to be made for the rapid distribution of all emergency radio equipment. This plan should include brief operating instructions and the emergency radio channels to be used by each group and shall also include plans for the rapid deployment of all mobile repeaters by Fire and Police.

Plans are to be made for the rapid cooperation on radio matters with adjacent jurisdictions including Detroit and Michigan and with the RCMP and OPP and The City of Windsor. This plan should include brief operating instructions and the emergency radio channels to be used by each group.

The Emergency Telecommunications Coordinator shall inform all users and potential users on a quarterly basis of the availability of this dedicated emergency radio equipment. Concurrently, the radio distribution plan should be circulated. Emergency communications training exercises and major event participants may use this equipment. Any weakness or discrepancies in the emergency radio equipment thus identified will then be corrected.

#### **4.0 EMERGENCY RADIO AND TELECOMMUNICATIONS MEASURES TO BE TAKEN WHEN AN EMERGENCY EXISTS BUT HAS NOT YET BEEN DECLARED**

The Emergency Telecommunications Coordinator shall inform the service provider and all users and potential users that an Emergency could be declared in the immediate future and will circulate the distribution plan and user instructions by e-mail. All emergency radio equipment will be put on charge. All accessories shall be checked.

### **Context**

Every municipality must form a committee responsible for overseeing the development and implementation of its emergency management program. The committee's membership is somewhat defined within the EMCPA; however, in addition to the individuals required to be part of the committee under the legislation, the municipality is free to include whomever else it wishes. It is not required that all committee members be municipal employees.

### **Committee Membership**

The Town of Amherstburg municipal emergency management program committee is a key organizational step toward making the emergency management process more effective. To reach its full potential, the committee represents the various organizations that have, or should have, a role in implementing and maintaining the municipal emergency management Plan and Program.

### **Roles and Responsibilities**

The municipal emergency management program committee's main

responsibility is to oversee the development, implementation, and maintenance of the municipal emergency management program, including the municipal emergency response plan, public education program, training, and exercises. The committee is also accountable for the annual review of the municipality's emergency management program.

To achieve consistency with recommended practice, the committee also reviews and evaluates municipal activities, such as exercises, actual emergencies, and provides support and resources to the CEMC, based on the current goals and objectives of the emergency management program. Annually the committee conducts a review of the whole program, including goals and objectives, and make revisions as necessary for the upcoming year. If it is determined that changes are indeed required, then the committee is responsible for making recommendations for program changes or enhancements to Municipal council.

### **During an Emergency**

Although in general the municipal emergency management program committee does not play a formal role during emergencies, some of the program committee members are also members of the Community Control Group (CCG). Therefore, these members play a more official role in the municipality during an emergency, while other members of the program committee may be called upon for support if needed.
